Summary

Experienced software engineer with expertise in full stack development using the .NET stack, Vue JS, and Microsoft Azure. I am passionate about solving complex problems and delivering efficient, user-centric software solutions. I am always looking for new opportunities to develop myself further and make a difference in the company I work for.

Skills

- C#
- .NET
- Vue JS
- Azure
- SQL
- Entity Framework
- Microservices
- RESTful APIs
- DevOps
- Agile methodologies
- CI/CD pipelines
- CQRS
- Docker
- Terraform
- Kubernetes

Experience

Senior Lead Software Engineer

One Beyond Ltd, London, England, United Kingdom (Remote)

Apr 2023 - Present

- Lead a team of software engineers in the design, development, and deployment of web applications using the .NET stack, Vue JS, and Microsoft Azure.
- Architect and implement scalable and reliable cloud-native solutions leveraging Azure services such as Azure App Service, Azure Functions, Azure SQL Database, and Azure Storage.
- Collaborate closely with product managers and stakeholders to gather requirements, prioritise tasks, and ensure timely delivery of high-quality software products.
- Mentor junior developers, providing guidance on best practices, coding standards, and professional development opportunities.
- Conduct code reviews and contribute to the continuous improvement of development processes and methodologies.

Senior Software Engineer

One Beyond Ltd, London, England, United Kingdom (Remote)

Jan 2023 - Apr 2023

- Developed and maintained backend services.
- Designed and implemented front-end components and user interfaces using Vue JS.
- Integrated third-party services and APIs to extend the functionality of web applications.
- Collaborated with cross-functional teams to troubleshoot issues, implement feature enhancements, and optimise application performance.
- Participated in development sprints, daily stand-ups, and sprint planning meetings.

Software Engineer

One Beyond Ltd, London, England, United Kingdom (Remote)

Nov 2021 - Dec 2022

- Contributed to the development of a micro services architecture using .NET Core and Docker containers.
- Implemented authentication and authorisation mechanisms using Azure Active Directory and OAuth 2.0.

- Designed and optimised database schemas and queries for performance and scalability using Entity Framework Core and Azure SQL Database.
- Automated deployment processes and CI/CD pipelines using Azure DevOps CI/CD & Github workflows.
- Collaborated with QA engineers to develop and execute automated load test scripts and ensure software quality and performance.

Software Developer

Boston Digital Ltd, October 2018 - Nov 2021

- Promoted from Junior Software Developer to Software Developer, involved in every aspect of system development and architecture planning for new features.
- Led the architecture and design for a new double-entry accounting system to manage users' transactions and earnings.
- Developed machine learning models, using azure cognitive services to segment users based on various questions, enhancing marketing effectiveness.
- Conducted code reviews.

Junior Software Developer

Boston Digital Ltd, July 2018 - October 2018

- Planned and developed multiple .NET-based micro services for backend systems.
- Contributed to the development of multiple mobile apps built with Xamarin Forms and a web SPA built with Vue JS.
- Presented and demonstrated new product features to the business in bi-weekly demos.
- Built various CI/CD pipelines using Azure DevOps and MS App centre.
- Documented technical and functional specifications.

Apprentice Software Developer

Boston Digital Ltd, July 2017 - July 2018

- Completed a level 4 software development apprenticeship, focusing on .NET backend systems and Vue JS frontend web SPAs.
- Excelled at rapid development and management of technological issues for assigned projects.
- Designed and developed a mobile tracking app generating £100k/pm in subscription sales using Xamarin Forms, which was released to both Apple & Google stores.

Education

Professional Qualifications

- Microsoft - Advanced programming in C#
- BCS - Level 4 diploma in software development
- BCS - Level 4 diploma in software development methodologies
- TQUK - Principles of Team Leading

Additional Courses

- App & Web Development Fundamentals
- Firebrand SCRUM master training
- ISTQB Software Testing
- MCSA Database fundamentals
- Microsoft Advanced Programming in C#
- TQUK - Principles of team leading
- Multiple Twilio superclasses
